

In its fourteenth year, International Women's Ministries saw record-breaking donations totaling over \$60,000. Due to the generosity of our donors, missionary partners were supported monthly as they did the work of spreading the gospel; dozens of homes and buildings were restored after the devastation of Typhoon Odette in the Philippines; educational support, training, and transportation was provided to teachers in Nicaragua; a missionary was able to return to her beloved Zambia; and young women and girls received feminine hygiene products and education in Ghana.

Above: IWM donations were nearly equally divided into three parts: Donations to Missionaries, Donations to our General Fund, and Donations to Missions Trips.

Above: Missionary Support comprised over half of our expenses in 2022, while Gifts to Missionaries were given out of the General Fund. The remaining twenty-nine percent of General Fund Expenses went toward regional travel as well as administrative costs, such as insurance or software.

IWM remains consistent and accountable as we serve women in ministry around the globe, wiping the tears of our sisters. Every donation given goes directly to the missionary for the purpose it was given. International Women's ministries never takes a cut or a percentage of any donation, nor does any board member of IWM receive compensation as they serve.

Although COVID kept us from much international travel in 2022, we still ministered in Nicaragua and Guatemala, as well as serving domestically in Tennessee and Arkansas. These regional or domestic ministry trips were fulfilled with general fund donations; we thank you!
